Profile

Passionate software engineer committed to advancing technical expertise and embracing open-source principles. Dedicated to driving innovation through collaborative software development.

Education

B.Sc. in Computer Science and Engineering 2020 – 11/2025
University of Rajshahi Rajshahi, Bangladesh

Skills

- ASP.NET Core | Angular
- Unity Engine | React
- Bash | Docker | Git | Linux

Professional Experience

Inument Solutions Ltd. 11/2025 – Present
Software Engineer Dhaka, Bangladesh

- Working with CQRS, MediatR, Clean Architecture, and MSSQL in a financial domain.
- Analyzed SQL Server execution plans and designed appropriate indexing strategies to improve several query performance by **>95%**.
- Built a scheduled **background reporting system** to generate and distribute sales reports automatically, reducing manual effort and improving decision-making.
- Collaborated with the team to migrate backend from .NET 6 to **.NET 10**, ensuring a seamless transition through parallel production monitoring, gradual traffic migration, and a month-long validation period.
- Implemented **domain-level change tracking** for core entities, capturing field-level modifications with user attribution to enhance data integrity and compliance readiness.
- Integrated **Hangfire** Dashboard with existing JWT-based authentication and role-based access control, enabling secure access for system administrators without a separate authentication flow.
- Implemented **NSwag and Orval** based API client generation from the ASP.NET Core OpenAPI specification for Angular and React applications, reducing contract mismatches and frontend integration errors.
- Integrated Leaflet-based **interactive maps** into the React application to display outlet locations and the user's current location, improving outlet discovery and the overall customer experience.
- Adopted and integrated **PrimeNG v18** across the Angular admin application, enabling more flexible component customization and improved control over complex UI.

Inument Solutions Ltd. 08/2025 – 11/2025
Software Engineer (Part Time) Dhaka, Bangladesh

- Developed a scheduled background processing system using **Hangfire** to dispatch digital assets at configurable date and time, with execution status tracking and monitoring for operational visibility.
- Implemented transactional splitting and allocation logic using **TransactionScope** to ensure data consistency and atomicity across multi-step operations.
- Collaborated with senior engineers to deliver production features while following Clean Architecture and established development practices.

Vivasoft Limited (Weekdemy 1.0) 10/2023 – 03/2024
Backend Developer Intern Rajshahi, Bangladesh

- Completed a comprehensive learning and development program focused on backend development.
- Technologies Practiced: **Go** programming language with **Echo** and **GORM** libraries.
- Developed a tool to parse and load mass user data from CSV files for a product into a database, streamlining data import processes.

Projects

DeltaShare
Cross-platform file-sharing solution using .NET (https://github.com/Learnathon-By-Geeky-Solutions/dotcube)

- Developed a cross-platform file sharing application using .NET MAUI and ASP.NET Core, supporting Android, iOS and Windows.
- Implemented a pool-based file sharing mechanism for seamless discovery and transfer of files across devices.
- Applied Community.MVVM for clean architecture and maintainable front-end logic in MAUI.

Workspaces+
Firefox Extension (https://addons.mozilla.org/en-US/firefox/addon/workspacesplus/)

- Enhances productivity by organizing Firefox tabs into separate workspaces.
- Continuously updating and maintaining the extension to ensure compatibility with new Firefox versions and improving user experience based on feedback.
- active user count: 140+

OS-Pulse
Real-Time System Monitoring Platform for Windows (https://github.com/jarx64/os-pulse)

- Developed a real-time system monitoring platform with Go backend and React dashboard.
- Implemented real-time system event tracking (process, file, and network activity) with modular monitoring agent.
- Designed scalable PostgreSQL storage and isolated execution for analysis.
